

To Our Customers:

*We would like you to know that we are open for business to support you and your connectivity needs in a time when connectivity and communication is more important than ever.*

*We would hardly call any of this business as usual. We have team members working both remotely and in our offices and we are prepared to continue providing the quality experience and products that you have come to trust.*

*At this point and based on all the known factors, we have not experienced a disruption to our customers related to the current situation with COVID-19. The well-being of our team is our top priority and we are closely following CDC and government guidelines to keep our teams safe and healthy.*

*Our customers, sub-contractors and suppliers will be allowed to continue operations per N-33-20 executive order signed by Governor Gavin Newsom. In addition, the Defense Industrial Base Essential Critical Infrastructure Workforce document further describes our essential business status.*

*Thank you for your support and partnership.*

**Sincerely,**

*The Field Components Team.*
